

RETIREMENT PLAN

Did You Know?

YOUR EMPLOYEE ASSISTANCE PROGRAM (EAP) CAN HELP YOU FINANCIALLY PLAN FOR RETIREMENT.

Retirement is a much anticipated time in many employees' lives. But this particular life transition can also bring with it added stress due to financial uncertainties. Your EAP offers consultative resources that can help you plan for financial success during retirement.

Our team of Accredited Financial Counselors are available to consult with members by calling the toll-free Helpline. They can assist with a variety of financial topics such as:

- Bankruptcy prevention, debt reduction, purchasing a home, college savings, and financial planning.
- Anticipating your costs post-retirement and determining what your income landscape looks like.
- Educating you on a variety of investment options with the assistance of a financial planner.
- Providing referrals to local financial planners should you want to take the next steps to creating a financially-sound retirement.

Counselors may discuss investment risk, employer-sponsored plans or pensions, Social Security, and other investment types, but, as Accredited Financial Counselors, they do not have the ability to handle money, which means they cannot help you to compare individual investment types (such as one stock as opposed to another).

Call today for your free consultation!
